All FKM Processors and Users

Subject: New product launch

To its ever expanding portfolio of fluoropolymer resins, Gujarat Fluorochemicals is announcing an important addition of **low-temperature peroxide-curable FLUONOX® FKM**. This product imparts critical performance in demanding applications in automotive and industrial sectors that require low temperature flexibility.

We are offering two grades suitable for wide range of molding, calendaring and extrusion processes, providing outstanding processability.

Grade name	KR621PLT	KR651PLT
Mooney viscosity ML (1+10)' at 121°C (250°F)	20 MU	50 MU
Fluorine content	64%	
TR10	-30°C	
Appearance and physical form	Translucent sheets	

The new FKM product line is classified FKM Type 3 as per ASTM D2000.

This product is manufactured without the use of PFAS surfactant inline with the recommendations of European regulators and the EU PFAS restriction proposal.

Regular commercial production is commencing during Q2 2024. Samples are readily available. Your account manager will contact you to understand your requirement for product validation and supplies.

We thank you for your valued business and confidence in FLUONOX® FKM products.

PS: Enclosed herewith are Technical Data Sheet and Safety Data Sheet.
